## SUMMARY

---

Computer Science student with a strong interest in software development, AI, and innovative projects. Passionate about building practical applications through hackathons and academic work.

## WORK EXPERIENCE

---

### Team Lead & Vendor — DesiCrew

Contractual

Led a remote team to successfully complete project tasks, coordinated with internal members and vendors, monitored progress, ensured quality, managed reporting workflows, and onboarded new team members. Also handled vendor management, task distribution, and resource planning.

### Other Experiences

- **Project Work:** Contributed to various academic and personal projects in web development, app development, and design.
- **Leadership Roles:** Led teams in college events, technical fests, and group projects, developing skills in coordination and problem solving.

## EDUCATION

---

2023 - Present	B.Tech in Computer Science at <b>NIST University</b>	(Pursuing)
2022	Class 12th (Intermediate)	(68%)
2021	Class 10th (Matriculation)	(80.3%)

## PROJECTS

---

### Portfolio Website

[GitHub Link](#)

A responsive personal portfolio website built with HTML, CSS, JavaScript, and Bootstrap. Features an interactive chatbot and a contact form powered by Google Apps Script.

- Fully responsive design for all devices
